

DERMAL FILLER CONSENT FORM

Treatment with dermal fillers can smooth out folds and wrinkles, add volume to the lips, and contour facial features that have lost their fullness due to aging, sun exposure, illness, etc. Facial rejuvenation can be carried out with minimal complications. These dermal fillers are injected into the skin with a very fine needle. The products produce a natural volume under the wrinkle, which is lifted up and smoothed out. The results can often be seen immediately. Treating wrinkles with these dermal fillers is fast and safe and leaves no scars or other traces on the face.

I understand that the actual degree of improvement cannot be predicted or guaranteed. Furthermore, I understand that the effect will gradually wear off and additional treatments are necessary to maintain the desired effect. Results depend on the filler as well as the amount or volume of the filler. Using multiple syringes often results in more dramatic improvement of wrinkles. I understand that I am responsible for cost of each filler syringe and treatment without any guarantee of results.

***Side effects and complications include but are not limited to:**

- Potential allergic reaction. As with any product, allergies can develop during or after injection. Patients with known allergy to these fillers or certain food allergies or numbing medications should avoid these injections.
- Injection site reactions: a lumpy or “thick” feeling at or just under the skin, bruising, hematoma, redness, discoloration, induration, scars, vascular occlusion, itching, pain, nerve damage, infection, over-correction, granulomas, palpable or visible material, blindness, tenderness, swelling, asymmetry, or shifting can occur.
- Injections into the lip area could trigger a recurrence of facial cold sores (Herpes simplex infections) for patients with a history of prior cold sores.
- Further treatment for additional improvement, or correction of side effects or complications may be necessary. I understand I am responsible for all such cost.
- I understand that the majority of humans have facial asymmetry and therefore perfect symmetry is unrealistic in most cases.

I understand the possible need for local anesthesia to reduce the discomfort of the procedure and consent to the topical application of anesthetic gel and/or injections of anesthetic for a nerve block or local infiltrative anesthesia. I understand the above, and have had the risks, benefits, and alternatives explained to me, and have had the opportunity to ask questions and refuse treatment. I have chosen this treatment voluntarily and no guarantees about results have been made. Further treatments may be needed. Payments are non-refundable. To the best of my knowledge, I am not pregnant, and I am not breastfeeding. I give my informed consent for fillers injections today as well as future treatments as needed by_____. This consent is valid indefinitely unless revoked in writing.
